PROJECTS

Ecommerce — *single vendor site*

- Implemented Tailwind CSS for responsive and visually appealing frontend design, allowing for quick styling and customization.
- Incorporated various external React libraries to enhance site functionality and user experience, such as react-router for navigation, react-bootstrap for UI components, and react-hook-form for form handling.
- Employed Redux Toolkit for efficient state management, ensuring seamless data flow and improved performance across the application.
- Integrated a secure payment gateway (e.g., Stripe) to enable seamless and secure online transactions, providing users with multiple payment options.
- Developed an admin dashboard to facilitate easy management of products, including functionalities for creating, updating, and deleting products.

ToDo Mern:

- **Innovative Features:** Implemented unique functionalities like real-time collaboration or advanced task management.
- **Scalability Optimization:** Focused on enhancing scalability and performance through techniques like caching and database indexing.
- **User Experience (UX) Design:** Prioritized intuitive UX with responsive design and accessibility features, incorporating user feedback.
- **Version Control and Collaboration:** Proficient in Git for effective version control and adept at collaborating with team members to ensure project success.

Ecommerce — *Multi Vendor site*

- Designed as a multi-vendor marketplace where multiple vendors can register, list their products, and sell to customers through website.
- Implemented individual dashboards for vendors, allowing them to manage their products, view sales data, and handle orders efficiently. Vendors can add new products, update existing listings, adjust prices, and manage inventory from their personalized dashboard.
- Created an admin dashboard with comprehensive functionalities for managing all aspects of the multi-vendor platform. The admin dashboard allows administrators to oversee vendor activities, moderate product listings, monitor sales performance, and handle customer inquiries and disputes.seamless data flow and improved performance across the application.

SKILLS

Languages :

Javascript , C++

Technologies : React

JS ,Node JS, Express JS,
MongoDB, SQL

Technical skills :

redux , socket.io, redux
toolkit,Tailwind Css ,
MaterialUI, state handling,
Cloudinary,Context api, API
integration, Stripe
integration, nodemailer, Git,
Github

EDUCATION

University Of Education,
Township, Lahore — *BS
Information Technology*

June 2022 - May 2026.

LANGUAGES

English , Urdu
